**Branch:** Southwest

**Scope(s) of Practice:** Environment  
Plant/Crop Sciences  
Soil Sciences

**Area(s) of Practice:** Range management  
Erosion control  
Natural resource management  
Soil fertility/Nutrient planning

**Biography:**

Convocated with distinction from the College of Agriculture and BioResources in 2009 with a Degree majoring in Environmental Science and Minor in Soil Science.

I worked in Canola Breeding Research at Viterra/CPS in Saskatoon from 2009-2015 then moved to my husband's family farm near Swift Current and worked as a Land Agrologist with the Government of Saskatchewan and started helping to manage the farm. In 2017 we started our family and during the last few years we have greatly increased our commercial calf cow herd size, increased our grazing sustainability and became a VBP+ operation all while raising 2 young children.

I am very proud of the family and the business that my husband and I have built in the last 5 years. I am looking forward to actively participating more in the Ag Industry again.
